

# **E-Learning in Paul Verlaine Metz University: current and on going actions**

**Pierre PINO**  
**President of the TICER\* Committee**

**\*TICER : ICT** (Information and Communication  
Technologies in Education and Research)

# Introduction

We take the “train” of the new technologies uses since few years:

- implementation of the ENT (virtual desktop) for all
- implementation of “Moodle” in the way to use Collaborative software with the students
- Participation in “national actions” : UNR, UNT CANAL-U, MIPE, ...
- Participation in LUNO (FOAD)
- Participation in european educational formation : ECS, ISFATES, ...

# Current actions: new technologies uses

## **ENT (virtual desktop):**

The new technologies are used to communicate with all people (web, mail, shared documents, virtual usb key, ...)

## **Moodle (collaborative tools for teaching):**

In the classroom:

- on line lessons/exercises
- each student can make the lesson/exercise at his own speed

For the lessons complements :

- web site to see for more information
- pdf documents
- wiki, forum, chat, ...

**A formation plan exist to learn these tools**

# Current actions:

## Participation in national actions like

**UNR** : regional numerical university (UNIRE)

**MIPE** : notebooks for the student operation (notebooks loan, open source software, numerical resources, ...)

**C2I** : integration of the computer sciences and internet certification (massive use of Elearning)

**UNR** : active member to the thematic numerical university called "UOH" for Open Humanities University

**Canal-U** : national web site TV for the university, we manage the social program called "Canal SOCIO"

# Current and on going actions: for the educational formation

## **In France near 100% Elearning uses:**

DUAP : computers science and communication in LUNO framework

## **European formation without 100% Elearning but... in progress:**

ECS : European computer sciences (3 countries, 3 languages)

ISFATES (Sarrebuck HTW)

# On going actions

## **We want to develop Elearning in Metz university:**

- increase the new technologies uses especially to the teacher ⇒ massively increase their formation

Some educational actions with other countries are in place  
(Tunisia, Morocco, Germany, ...)

⇒ integration of the E learning uses

(towards 100% new technologies uses)

In TICER and the CIO committees, we works on  
Elearning/Mlearning development in Metz university :

**WHY/HOW and especially for WHO ?**

Thank you for your attention
